-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Valiulis (6,145,231).

Valiulis discloses a labeling system for using labels to provide information pertaining to merchandise, comprising a merchandiser 12 adapted to support the merchandise; a label holder 14 mounted to the merchandiser, the label holder is of the type that supports labels without an adhesive bond (i.e., by snap-fit. See column 4, lines 14-22). Valiulis further discloses a friction coated label 30 removably secured to the label holder by the support means, the label including a face stock and a friction coating 54, the face stock having printed indicia 31 thereon, the friction coating disposed between the face stock and the label holder to inhibit migration of the label relative to the label holder, the friction coating comprising a weak adhesive (i.e., it is weak in relation to the release liner 40) which may be rubber-based (column 5, line 47).

Regarding claim 3, see column 5, lines 31-39.

Regarding claim 5, the recitation that the label includes a bar code and a price does not patentably define over Valiulis because it has been held that patentable novelty cannot be principally predicated on mere printed matter and arrangements thereof, but must reside basically in physical structure. *In re Montgomery*, 102 USPQ 248.

Art Unit: 3611

Regarding claims 6 and 7, it is not known what the range of the skid value is. However, it would have been obvious to make the friction coating have the range of skid values recited because it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Regarding claims 8 and 9, it is not known what the range of the release value is. However, it would have been obvious to make the friction coating have the range of release values recited because it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Valiulis (6,145,231).

Valiulis discloses the invention substantially as claimed, as set forth above. However, it is not known what size the label is. It would have been obvious to make the label of the dimensions recited, because such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

5. Claims 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary C. Hoge whose telephone number is (571) 272-6645. The examiner can normally be reached on 5-4-9.
